Accountable Recycling

By Sheba Wheeler

A new home product making its debut at The Container Store this week gives people a way to track their contributions to a more earth-friendly lifestyle. The **Mode Premium All-in-One Recycling Center**, featured in Williams-Sonoma and Frontgate catalogs, is a battery-powered recycling console that includes a digital monitor system that tracks how much has been recycled and posts reminders about recycling-day pickups. Stainless-steel accents help it blend in with today's modern kitchen designs. Challenge yourself or your friends to see who can push the pedal and compact the most recyclables. Available in black or stainless steel. \$179.99- \$299.99.
