Recycle and Save

Can you believe that an aluminum can will still be a can 500 years from now if it's thrown away? But get this: If recycled, it can be used to make new cans within six weeks. And better yet: it can be recycled an unlimited number of times.

Still not convinced you should recycle? The Mode Premium All-In-One Recycling Center can make it easy -- and fun.

The center allows you to sort glass, plastic, metal and paper, and crushes items up to 66 percent when you step on its foot pedal (no electricity necessary).

Compacted items drop into a rear bin, which comes in 8- and 5-gallon sizes that nest for easy transporting. Bonus recyclable bin liners are included.

An eco-track system measures your recycling habits so you can pat yourself on the back for making such a positive impact. No need to worry about missing pick-up days because the recycling-day reminder won't let you.

Cost is \$299. Details: [Front gate.com](http://Frontgate.com).
